SCHEDULE Y: OPEN ACCESS WORKFLOW

1 Workflow: Eligible Corresponding Author identification

- a) During the submission of the article, the submitting author is responsible for correctly identifying the Institutional affiliation of all authors, to identify the corresponding author and to provide institutional email addresses. When entering an institutional affiliation Sage provides the author with suggested matches during this process. The author is responsible for selecting the appropriate match.
- b) In the event of no match being found, Sage will attempt to identify an Eligible Corresponding Author using the corresponding author's email address domain.
- c) Sage will use this match to identify an Eligible Corresponding Author as an Authorised User of the Customer using RinggoldID matches.
- d) The Customer is responsible for providing and updating the list of applicable Ringgold IDs for Sage to use in matching. The Customer is responsible for ensuring the list of applicable RingGold IDs covers only affiliations where all authors at the affiliation are also teaching and research staff employed by or otherwise accredited to the Customer as well as students enrolled or accredited to the Customer.
- e) The Customer is responsible for providing and updating the list of applicable email domains for Sage to use in matching.
- F) If the author was not identified as eligible due to incomplete, inaccurate or conflicting affiliation data provided by the submitting author, Sage will not be required to convert the article to Open Access at a later date, but may offer to do so at Sage's sole discretion.

2 Workflow: Open Access publishing of Eligible Articles (Hybrid)

- a) Upon an Eligible Article (Hybrid) with an Eligible Corresponding Author entering Sage's production system all authors will be contacted by the Sage to inform them of their right to publish the Eligible Article (Hybrid) as Open Access with no direct cost.
- b) Transacting author (who can be any of the Article authors, including the Eligible Corresponding Author) enters the Sage's open access portal and confirms acceptance of Open Access publishing for the Eligible Article (Hybrid).
- c) Transacting author confirms their identity and the copyright ownership status of the Eligible Article (Hybrid).
- d) Transacting author selects the appropriate CC-BY license under which their Eligible Article (Hybrid) will be published. By default, the transacting author will be offered the CC BY-NC 4.0 license. CC BY 4.0 will be offered when Sage is aware of a funder mandate that applies. CC BY-NC 4.0 will be offered when SAGE is aware that commercial sponsorship applies. Sage's open access portal will provide explanatory text alerting author to why license(s) is displayed. Author may contact Sage OA customer service if another license is required.
- e) Transacting author digitally signs the Open Access license.
